## Fund Review and Strategy

At the end of December, the Fund had total assets of approximately GHS 779 million, with ~26% invested in Government bonds and ~74% in short-term fixed deposits. The main and sub-classes recorded annual returns of 19.4% and 22.1% respectively, against a benchmark of 30.7%. The Fund's strategy to provide adequate liquidity will remain unchanged in the first quarter of 2025 by investing in short-term fixed deposits.

## Market Overview

In 2024, the Government's constrained financing options shaped Ghana's economic landscape, leading to a still-high-interest rate environment. Inflation closed the year at 23.8%, surpassing the Bank of Ghana's target of 18%. On the fixed-income market, treasury bills primarily dominated activity, with foreign investors' interest in the secondary market improving. The new administration is expected to present its budget in March; the context is critical in providing policy direction for the market.
