Fund Review and Strategy

SIFT's assets under management were circa GHS 457M at the end of November 2024. The Fund's year-to-date return was 15.4% and 21.6% (AMC sub-class), with a benchmark of 11.6%. At the end of the reporting period, the Fund had ~65% of its assets in bonds and 35% in cash and near-cash assets. In December, the Fund would maintain its strategy by investing in short-term fixed deposits to provide adequate liquidity to meet withdrawal obligations.

Market Overview

The Monetary Policy Committee's decision to maintain its policy rate at 27% reflects a cautious stance amidst concerns about sustained inflationary pressures. The Bank of Ghana (BOG) revised its projection for inflation to return within the target band of 6% to 10% to Q4-2025 from Q3-2025, underscoring upside risks to inflation. On the currency front, the Cedi appreciated 6% against the Dollar in November due to interventions from the Central Bank on the forward market aided by the Gold Purchasing Program. The operationalization of the gold coin investment could serve as an alternate option for holding Dollars, offering diversification and a hedge against currency volatility.
